

# TRANSCRANIAL DOPPLER (TCD) EDUCATION

At Gulfcoast Ultrasound Institute located in St. Petersburg, Florida Transcranial Doppler Education is offered as both an online course and blended course that are taught by leading vascular ultrasound experts and covers cerebrovascular anatomy/physiology, Doppler principles, scan techniques, interpretation criteria & interactive interpretation sessions. Extensive hands-on workshops are provided in the blended course with 3:1 participant to faculty hands-on scan ratios allowing all participants to have the highest confidence to immediately integrate the skills learned into clinical practice.

## Blended Course

- Online course + one day (6 hours) scanning
- 15 months UNLIMITED access to online course
- 3:1 participant to instructor scan ratios
- Scan logs & case logs available upon request
- Expert, approachable hands-on instructors
- Scan workshops include live, human models
- Implement skills learned into clinical practice
- Expand diagnostic & interventional services
- Provides 17AMA PRA Category I Credit(s)™

## Online Course

- 12 months UNLIMITED access
- Video lectures, and scan demonstrations
- Interactive components and quizzes
- Implement skills learned into clinical practice
- Expand diagnostic & interventional services
- 11 Optional AMA PRA Category I Credits™
